Committed to Socio-Economic Development

We consider national content as key for the success of our operations. We will therefore promote national participation and local content development by developing the following mechanisms:

- Creation of sustainable industries and businesses.
- Ensuring that Ugandans and Tanzanians profit from existing valuable industries and businesses in both countries.
- Reinforcing the use of local Ugandan and Tanzanian native contractors through training programs and support to local companies.
- Incorporating national content programmes in project contracts to encourage and develop local procurement of goods and services.
- Support supplier development by reducing the complexity of contracts in a way of making them accessible to the local contractors.
- Encourage and support the formation of joint ventures between international and local companies to facilitate transfers of competencies and local content.
- Incorporate national content programmes in project contracts to encourage and develop local procurement of goods and services.
- Support supplier development by reducing the complexity of contracts in a way of making them accessible to the local contractors.
- Encourage and support the formation of joint ventures between international and local companies to facilitate transfers of competencies and local content.

We will assist with the establishment of local management and technical capabilities in Uganda and Tanzania, including, but not limited to:

- Local supplier development programs aimed at building capacity at national and community level.
- Internships and attachment of Tanzanian and Ugandan citizens at national and community level in the oil & gas sector.
- Participation in the Industry Enhancement Centre including Health, Safety, Environment and Quality standards.
- Support to the Industry Enhancement Centre including Health, Safety, Environment and Quality standards.
- Support of existing institutions in Tanzania and Uganda by providing knowledge, technology, mentorships and scholarships.

Employment Creation

During the construction phase, the EACOP will create possibilities and opportunities for both highly skilled professionals, semi-skilled and casual labourers.

Enhancement of the central trade corridor

The project will contribute towards the enhancement of the trade corridor between Uganda and Tanzania through the development of new infrastructure, logistics, technology transfer and the improvement of the livelihood of East Africans and the rest of the world.

Commitment to Stakeholder Engagement

The EACOP Project is committed to meaningful engagement with all of its stakeholders based on the principles of participation, respect for human rights, equalization, empowerment, transparency and accountability. Stakeholder engagement will therefore be conducted in order to:

- Understand and respect all stakeholders.
- Establish lasting, positive relationships with stakeholders.
- Provide project information to enable stakeholders to contribute meaningfully all along the process.
- Work cooperatively with stakeholders to understand their concerns and seek solutions.
- Commit towards the addressing of stakeholder concerns in a fair and effective manner.
- Inform stakeholders about the Project Community Grievance Mechanism so that they can use it, if necessary, to raise any grievances they have about unplanned impacts of the project.

The Pipeline Route

The EACOP Project

The EACOP is a 1,443km oil export pipeline that will transport Uganda’s crude oil from Kabaale – Mina in Uganda to the Chongoleani peninsula near Tanga port in Tanzania for export to the international market. The major export system, 24 Inch, insulated, buried pipeline, six pumping stations (2 in
2. Construction of the Temporary Facilities

Other facilities required to support the construction will be built
such as; a Coating plant, Pipe storage yards, camps for the
construction teams and access roads. These will be restored
such as; a Coating plant, Pipe storage yards, camps for the
construction teams and access roads. These will be restored
other uses as appropriate at the end of the
construction phase.

3. Construction of the Marine Terminal and the Jetty

The crude oil, transported by the pipeline will be stored in the
terminal located at Chongoleani, near

Construction will comprise of:

1. Construction of the Pipeline

The pipeline and the associated permanent facilities (Pump
Stations, Pressure Reduction Stations, Valve Stations etc) will be
constructed and tested in sections before the final connections
and commissioning of the complete system.

Construction Schedule

The EACOP Project is committed to ensuring that all landowners
and users living along the pipeline corridor will be treated with
respect and compensated fairly.

Land Access

Land will be required to construct and operate the East African Crude Oil Pipelines and related facilities.
In Uganda, land will be acquired permanently by the Ugandan Land Development Corporation (TPDC) and leased to the
EACOP Project.
In Tanzania, land will be acquired permanently by the Tanzania Petroleum Development Corporation (TPDC) and leased to the
EACOP Project

The pipeline route has been selected to avoid the environmentally sensitive areas like nationally and internationally recognized protected areas.
Facilities will be carefully located and operated to reduce potential physical and noise impacts on the populations and the environment.
We are committed to comply with national laws and international best practice, including International Finance Corporation (IFC)
Performance Standards (PS).

As part of our commitment to Biodiversity Conservation and Sustainable Management of Living Resources, we have
developed a biodiversity charter which sets the principles of our
work.

According to the charter, we carry out all EACOP activities
while:
• AVOIDING unnecessary impact to ecosystems, biodiversity
and local communities.
• MINIMISING and rehabilitating impacted areas.
• RESTORING and rehabilitating impacted areas.
• OFFSETTING significant residual impacts.
• RESTORING and rehabilitating impacted areas.

The EACOP Project aims to ensure that health, safety and security of communities, workers and the environment, are addressed and
commenced during the project.
