

PROJECT BRIEF

DATE: 30th September

PLACE: Main Camp & Pipe Yard 4 - Kyotera District

East African Crude Oil Pipeline (EACOP) Ltd. receives delivery of first batch of insulated line pipe for construction.

China Petroleum Pipeline Engineering Co. Ltd, the construction contractor for the East African Crude Oil Pipeline (EACOP) Ltd, has today received a delivery of 9 trucks from the coating plant in Tanzania of insulated line pipe at the Main Camp and Pipe Yard (MCPY) 4, in Kyotera District. These pipes will then be welded and buried along the right of way to transport of Uganda's crude oil, and their delivery demonstrates the continued progress of the project.

The insulated line pipes will be distributed to multiple designated storage sites along the 1,443-kilometer-long crude oil pipeline that will connect Albertine oil fields in Uganda to the Tanga port in Tanzania.

The insulation on these pipes enables the crude oil to be transported to be kept warm and the external environment to be kept cool, rather like a thermos flask.

With the arrival of the insulated line pipes in Uganda, the pipelay Contractor CPP will shortly commence laying of the EACOP pipeline in Uganda. The project remains on track to meet its construction and operational timelines, with a continued focus on safety, environmental sustainability, and local community engagement.

The construction of the EACOP Pipeline in combination with the Tilenga and Kingfisher projects will benefit the economies of Uganda and Tanzania include tax revenues for the two Host Governments, job creation, national content, new infrastructure, logistics, skills and technology transfer and enhancement of the trade corridor between Uganda and Tanzania.

- THE END -

East African Crude Oil Pipeline (EACOP) Ltd

The East African Crude Oil Pipeline is a 1,443km crude oil export infrastructure that will transport Uganda's crude oil from Kabaale - Hoima in Uganda to the Chongoleani peninsula near Tanga in Tanzania for export to the international market. This major export system includes 1,443 km (296 km in Uganda and 1147km in Tanzania) of insulated and buried 24" inch pipeline, 6 pumping stations, two pressure reduction stations and a marine export terminal in Tanzania.

Following the Final Investment Decision (FID) that was taken on the 1st of February 2022, East African Crude Oil Pipeline (EACOP) Ltd. on 15th February concluded the formation of the company that will construct and operate the pipeline.

EACOP Ltd. is a special purpose company, governed by its Shareholders Agreement in which TotalEnergies (62%), Uganda National Oil Company (UNOC - 15%), Tanzania Petroleum Development Corporation (TPDC - 15%) and CNOOC (8%) are shareholders.
