

VACANCY ANNOUNCEMENT

WHO WE ARE

The East African Crude Oil Pipeline (EACOP) project is a midstream development located across Uganda and Tanzania that includes a nearshore marine storage and export terminal (MST). Once completed, the EACOP Company will operate the East African Crude Oil Pipeline, a 1,443 km long, electrically heated crude oil export pipeline that transports oil from Kabaale - Hoima in Uganda to the Chongoleani Peninsula near Tanga Port in Tanzania for crude export to international markets.

Job Title: Spread Superintendent Reports to: Lot Manager Location: Field Job Type: Full Time

JOB SUMMARY

The spread superintendent is responsible for overall field management and pipeline supervision of the day-to-day construction activities of the EPcmC staff and contractors. They will ensure work is carried out using safe working practices and is completed in accordance with the project codes, standards, drawings, and specifications. The spread superintendent will be responsible for supervision of the pipeline ROW preparation and access, stringing, stacking, and general pipeline construction activities.

DUTIES & RESPONSIBILITIES

Field Management

- Responsible for maintenance and inspection activities of EACOP electrical equipment.
- To manage the allocated lot within the pipeline spreads and area packages.
- Directly supporting the EPcmC staff and the contractors, ensuring delivery of the pipeline and associated AGI, MST facilities, and EITS infrastructure are on time and to budget.
- Ensuring local partners and local contractors receive and understand clear instructions and guidance.
- To provide on-the-job training and coaching to local content personnel, liaising either directly or indirectly with training providers to ensure training is provided and performance is monitored.
- Ensure contractors are fully executing and complying with their contracted scope of work.
- Implement, use, and communicate safe work practices on and off the project sites.
- Participate in the review of project schedules with the project management team.
- Participate in constructability and technical design reviews to identify any opportunities for optimisation.

Pipeline Supervision

- Supporting the supervisors on the pipeline installations and coordinating daily reporting requirements.
- Coordinating ROW access permits, profile surveys, clearing, and grading works for final pipeline route.
- Planning and coordination of pipeline material deliveries and stringing activities along the ROW.
- Verifying the required civil and concrete works to support the pipeline placement activities are completed.
- Planning and coordination of pipe laying in readiness for welding activities.
- Ensure critical materials and equipment are being stored and monitored with preservation records available.
- Ensure third-party provider for NDE inspection and testing are not delayed due to access or schedule.
- Identify conflicts in construction progress and communicate them to project team for resolution.
- Providing instruction and supervision to junior field engineers on day-to-day pipeline scope execution.
- Ensure logistics team are managing ROS dates for site pipeline materials to maintain schedule.
- Interface with field engineering, ETIS, AGI, and MST superintendents to ensure the delineation of battery limit scopes are clearly communicated and understood by all stakeholders.
- Planning and coordination of ITP inspection surveillance and hold points by the designated personnel.

- Planning and coordination of system/subsystem completion for testing and commissioning readiness.
- Work within a multicultural business framework and provide ethical and compliant support.
- Mentor exemplary behaviour regarding HSE, ethics, and company "code of conduct" policy.

Academic Qualifications

- Tertiary/professional qualification in pipeline construction management or other company-agreed applicable discipline qualifications that support the construction management and execution of the onshore pipeline and related AGI, EITS, and MST facilities work scopes.

Experience Required

- Minimum 10 years of pipeline construction experience working within a cross-functional oil and gas pipeline project team supporting field engineering, interface, pipeline construction, and commissioning readiness.

Required Competencies

- Competency and proven experience within equivalent proprietary management systems and associated desktop applications for project delivery.
- Competency within industry applications such as Assure, OMIE, Aconex, SharePoint, Adobe, MS Office; Word, Excel, PowerPoint, Visio.
- A high focus on identifying and meeting the key project deliverables and objectives.
- Demonstrated knowledge of compliance, risk controls, and site HSE requirements.
- Demonstrate proficiency in the interpretation of engineering drawings, plans, and specifications.
- Comprehensive understanding of pipeline construction methodologies and execution strategy.
- Understanding of critical path and key milestones within the construction planning programmes.
- Demonstrated knowledge and understanding of the criticality of material ROS dates to support schedules.

HEALTH, SAFETY & ENVIRONMENTAL RESPONSIBILITIES

EACOP is committed to ensuring that the health, safety and welfare of workers, communities, and the environment are well addressed and managed. Therefore, the employee is mandated to:

- Fully complies with Company H3SE (Health, Safety, Social, Security & Environment) policies and Life Saving Rules.
- Actively participates in HSEQ and promotes this culture to co-workers.
- Remain vigilant and maintain continuous awareness of potential unsafe conditions.
- Communicates to management any HSE related concerns and ways to improve them.
- Maintains a workplace & workspace that is safe, clean, and always neat - practice good housekeeping.

HOW TO APPLY

The qualifying applicant must submit his/her Curriculum Vitae CV and a Cover Letter explaining why he/she is the suitable candidate for the position. Please submit your application only through ANY of the contact information provided below. Application deadline is on 22nd November 2024.
